Sage 300 Projects

sage

Count on Sage 300 Projects for expert management of estimating, tracking, costing, and billing of projects. Simplify cost control and planning, so you deliver on time and on budget, every time!

Use Sage 300 Projects to easily identify potential issues and determine success factors for any project. Streamline processes and reduce time spent on reporting and communications. Get a handle on elusive project costs, know what materials have been ordered or delivered, who has been billed and effectively track resources such as time spent on each project or job.

Take control of projects with better tracking, enhanced efficiency and greater accuracy.

Sage 300 Projects makes it easy for you to estimate projects, enter and report costs, track billings, payments and profits. Get effective project and job costing without breaking your budget, straining your internal resources, or compromising on functionality. Sage 300 Projects provides you with the insight you need to control costs and boost profits.

Industry Solution	Sage 300 Projects			
Target	Construction	Consulting	Professional Industries Requiring Time & Material	
Business Processes	Job Management & Planning	Material & Resource Allocation	Communication	Reporting & Review
Business Challenges	Cost Control & Planning	Determine Success & Profitability	Collaboration	Save Time

Meeting your main challenges and managing your projects

Cost control and planning - avoiding juggling a variety of spreadsheets, spending too much time on manual reporting and trying to get a handle on elusive project costs. Find a quick and efficient way to estimate projects, enter and report costs, and track billings and payments.

Determine success and maintain profitability - Maintain profitability and provide the necessary budgeting and profit analysis tools to report accurately, determining if projects are on track, costs are in line, and resources are properly allocated throughout the project.

Collaboration - effective project management requires a high level of communication between all entities involved, so you know what materials and costs have been ordered or delivered and who has been billed. Not to mention tracking other resources, such as time spent on each project or job.

Save time – Automating the processes of tracking, estimating, billing, reporting and dramatically streamlining processes in order to save time. Providing your management with immediate insight into all elements of the project.

Benefits

Sage 300 Projects

Sage 300 ERP

Sage 300 Projects delivers benefits across the core processes of your business

Sage 300 ERP

Sage 300 ERP is the backbone of Sage 300 Projects, designed to protect your software investment. The powerful financial tools of Sage 300 ERP help you confidently manage your company's complex finances. The Operations and Distribution Management modules ensure your business follows best practices for efficiency and accuracy by automating and integrating processes to keep your warehouse, inventory, production, and service departments aligned and running smoothly.

Sage 300 Projects

Sage 300 Projects provides an effective solution for project managers in construction, job service and other professional industries that require a time-and-material system. It delivers the tools necessary to manage the simplest to most complex contract or job. Sage 300 Projects makes it easy for you to estimate projects, enter and report costs, track billings, payments and profits. With categories that are easily customised to meet virtually any specification needed, it's flexible enough to manage large or small projects for any business environment. Get the efficiency of automated project and job costing without breaking your budget, straining internal resources, or compromising on functionality.

Intelligent Reporting

Sage 300 Intelligence Reporting offers better visibility to help you make faster, more informed and confident decisions. It empowers you to quickly and easily obtain the information you need for operations and strategic planning from your Sage 300 ERP solution. Sage 300 ERP Intelligence allows you to effortlessly create reports and analyse data using the familiar Excel application. It helps you optimise business processes across all facets of your business and provides decision-makers with insight into financial and operational performance. Sophisticated, customisable dashboards transform your data into strategic decision-making intelligence helping you effectively manage your business. Quickly identify and respond to trends and abnormalities utilising multidimensional analysis to perform what-if scenarios that go beyond transactional data. Extensive multicurrency and multi-company capabilities give you the competitive edge to succeed in today's fast-paced global marketplace.

Business Analytics

Sage Enterprise Intelligence is an innovative self-service data analysis and reporting solution engineered for ease of use and performance. Its intuitive User Interface and advanced features facilitate real-time access to enterprise-wide information, quickly and securely. More than Business Intelligence, Sage Enterprise Intelligence provides data entry and business logic capabilities, supporting applications such as budgeting and forecasting. It is a comprehensive, single Business Intelligence offering that helps companies of any size be more productive and as a result, improve their bottom-line.

Sage 300 Projects provides an effective solution for project managers in construction, job service and other professional industries that require a time-and-material system.
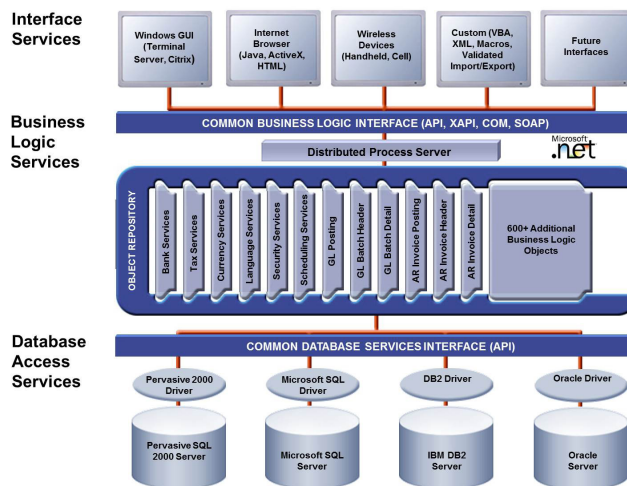

Sage 300 ERP Superior by Design

Investing in a solution with superior functionality will deliver a quick payback from more efficient operations. Selecting a product with a superior architecture will ensure that your investment will continue to pay dividends for many years. Superior software architecture has specific requirements that enable products built within its framework to adapt to fast-changing technology and stand the test of time. Using industry-standard technology is important and the ability to adapt to this technology is one requirement of a great architecture. Sage 300 ERP architecture and the realisation thereof is technology that has been created and owned by Sage. This architectural technology is Sage's key differentiator.

Our fundamental architectural foundation is the separation of core business logic from interface and database services. With these three layers separated, the core business logic can be connected to new databases and evolving interface components and devices—without costly re-implementation efforts and with the ability to maintain a single business logic code base.

The benefits of our superior design and good implementation is that Sage 300 ERP will:
• Stand the test of time
• Embrace industry standard technology quickly and naturally
• Customise easily to fit the special needs of your business
• Deploy flexibly to new paradigms such as Cloud and mobility
• Scale to the changing size of your business

sage

The Sage Group plc. is a leading global provider of business management software to small and medium sized companies, creating greater freedom for them to succeed. Sage understands how and why each business is unique. We provide products and services that suit varying needs, are a pleasure to use and are secure and efficient.
